Request for Proposals:  
CIBER Doctoral Student Research Award

IU CIBER invites business doctoral students to submit proposals for research on important topics within their field examined in a global context. The intent is to encourage doctoral students from all areas of business study to investigate an important topic in their field in a global context. The maximum award will be $2,500 and can be used to support travel for data collection, software, data, survey expenses and other relevant costs. These funds may not be used for salary or travel to present a paper at a conference. The IU CIBER will administer the funds for the recipient, and all international travel must be on U. S. carriers, wherever possible. It is anticipated that the research will be primarily conducted during the summer of 2019.

Proposals are due by March 1, 2019 with award decisions announced by March 20, 2019. The recipient is required to make a brief presentation about their research project to other doctoral students before October 30, 2019. Recipients are asked to acknowledge the support that the IU CIBER provided on any publications that result from the project.

Proposals should be two to three double-spaced pages and should include a brief summary of the relevant literature and research question, an overview of the proposed methodology and a section on the significance of the research findings. A brief budget, which totals up to $2,500, should also be included.

Please submit all proposals by email to:  
Amanda Wood, Program Manager, IU CIBER, ciber@indiana.edu
